

Worldwide Quarterly Cloud Infrastructure Services Tracker

IDC's *Worldwide Quarterly Cloud Infrastructure Services Tracker*® tracks revenue earned by vendors selling public and dedicated cloud infrastructure as a service. These markets combined provide a comprehensive view of cloud infrastructureservices. Revenues for providers such as AWS, Microsoft, and Google will be reported in the public cloud services markets, whereas portions of offerings such as HPE GreenLake, AWS Outposts, Microsoft Azure Stack, and Oracle Cloud@Customer will be reported in the dedicated infrastructure as a service.

Technology Coverage

IDC's *Worldwide Quarterly Cloud Infrastructure Services Tracker*® provides quarterly coverage (historical only) of cloud services revenue by vendor. The reported segments are:

Public Cloud Infrastructure as a Service (PClaaS)

- PClaaS compute (further segmented into compute type [virtualized x86, accelerated, bare metal, and other])
- PClaaS storage (further segmented into storage type [block, file, and object])

Dedicated Cloud Infrastructure as a Service (DClaaS)

- DClaaS compute
 - DClaaS storage
-

Geographic Scope

- Worldwide only
-

Data Deliverables

This tracker is delivered on a quarterly basis via a web-based interface for online querying and downloads. Deliverables for this tracker are listed below. For a complete delivery schedule, please contact an IDC sales representative.
