# Worldwide Quarterly Ethernet Switch ODM Direct Tracker

IDC's *Worldwide Quarterly Ethernet Switch ODM Direct Tracker*® provides a quantitative view of market trends and ODM Direct vendor performance in the datacenter Ethernet switch (white-box) market. Specifically, this tracker provides quarterly data for leading ODM Direct vendors by Ethernet switch speed (1Gb, 10Gb, 25Gb/50Gb, 40Gb, 100Gb, and 200Gb/400Gb). The data in this tracker leverages IDC's qualitative and quantitative datacenter networking expertise to provide quarterly quantification of market trends in the Ethernet switch ODM Direct market. IDC's *Worldwide Quarterly Ethernet Switch ODM Direct Tracker*® presents market data in an easy-to-use pivot table format that allows clients to track any vendor and product segments as needed. IDC's tracker products provide reliable, accurate, and independent market research as a base to create quantitative market analyses and study historical trends.

## Technology Coverage

Measurement for this tracker is in port shipments and vendor revenue. This tracker provides total market size and vendor share information for the following technology areas:

**Core Coverage**

*   Company and vendor
*   Technology: Ethernet switch
*   Speed: 1Gb, 10Gb, 25Gb/50Gb, 40Gb, 100Gb, and 200Gb/400Gb

## Geographic Scope

*   North America
*   Europe, Middle East, and Africa (EMEA)
*   Asia/Pacific (including Japan) (APJ)
*   Latin America

## Data Deliverables

This tracker is delivered on a quarterly basis via idc.com downloads. Deliverables for this tracker are listed below. For a complete delivery schedule, please contact an IDC sales representative.
