

IDC Government Insights: European Government Industry Intelligence

IDC Government Insights: European Government Industry Intelligence will provide technology vendors with a perspective on the European government market, looking at industry subsegments, core processes, and technology categories. This service will provide actionable information enabling European marketers, sales leaders and professionals, product managers, market intelligence, and channel managers to accelerate and simplify their jobs, including detailed data on industry trends, buying behavior, industry personas, and market sizing.

APPROACH

This advisory service offers a European view on the government industry and its subsegments, providing technology suppliers with actionable information on current and future technology purchasing behavior through IDC's proprietary data and analysis.

The service enables subscribers to assess European market opportunities accurately and better understand their potential prospects by analyzing ICT buyers, both IT and line of business. Research from the service will provide insights into buyers' varying priorities, considering process improvement drivers and their linkage to technology while offering useful guidance to build sales messages and go-to-market initiatives for digital technology providers.

TOPICS ADDRESSED

Throughout the year, this service will address tech suppliers' needs in the European region, including:

- Evaluating the government technology market opportunity in the European region
- Understanding government sector buyers and their priorities in the European region
- Preparing a focused go-to-market approach for the European region
- Refining regionally relevant sales messages
