Europe, Middle East and Africa Digital Regulations and Policies Radar

IDC's *Europe, Middle East and Africa Digital Regulations and Policies Radar* service analyzes public authorities' key regulations and policies that have an impact on the digital world in EMEA. The service offers tech providers a cross-industry and technology view of key regulations and policies and respective upcoming changes, enabling providers to understand how these policies might impact their priorities and solutions portfolios and provide new market opportunities. The service will support them in rapidly preparing and adapting their product offerings, go-to-market strategies, and narratives to new regulations and policies, while successfully addressing related needs and concerns. The service analyzes how the different tech areas and industries are affected by regulations and policies. Regulation-related technology and RegTech providers are covered, as are emerging solutions and vendors thriving in this space.

MARKETS AND SUBJECTS ANALYZED

- Digital regulations and policies impacting tech providers
- Regulation- and policy-related tech market opportunities
- Main technology areas and industries impacted by specific regulations and policies
